Jin Ji Bao Xi Endless Treasure Slot Machine

Jin Ji Bao Xi Endless Treasure is a

five-reel, three-row slot machine designed by Shuffle Master. It has 243 ways to win, replacing the standard paylines system we frequently see in other titles. Available special features include golden chance, Fu value, the Jin Ji Bao Xi bonus, free spins, the top up feature and fortune grand.

Online Slot Game

As the name no doubt signals,

this is a game with an ancient Chinese theme. We like the fact the developers added translations for some of the symbols you will find on the various icon designs. The background image is rather standard. It is composed of a lighter purple cloth. It looks nice, but it lacks any detail that would draw your eyes to it.

Symbol designs are a mix

of playing card royals and various icons that draw inspiration from Chinese mythology.

We have three fierce creatures in the form of dragons, phoenixes and tigers, and then a turtle and a fish. All symbols except the fish have both standard and higher-value golden designs. Whether an icon will appear golden depends on whether you enable it or not. More gold symbols result in bigger rewards, but increase the cost of each spin.

Jin Ji Bao Xi Endless Treasure Real Money Slot Game

This is a high variance

release with a top prize of 2800x your total stake. While it has potential to go higher, it cannot do so due to a win cap of €250,000 per spin. The easiest way to get that prize is to aim to win the grand fixed jackpot, worth 2304x your total bet.

The

lowest amount players can bet is €0.08, if they have one gold icon active. The maximum bet is €88, and requires you to have all five gold symbols active. Use the plus and minus buttons to set your coin value, which changes your total bet in turn. Once you find a wager you like, you can start spinning the reels! Shuffle Master added a great Auto Play option, allowing you to spin the reels automatically.

Bonus Games

Golden

Chance has a chance to activate during normal gameplay. For it to trigger, a Wild needs to land on reel three. It has a chance to turn that Wild gold, which can then substitute for all other icons. If the gold Wild is part of a winning combination, its payout will be doubled.

The bonus symbol comes with a coin value attached. This is the Fu value, which is chosen from a set of pre-defined values. The more gold icons you are playing, the bigger the Fu value can be! Their value are added to the pot above the reels when bonus symbols land.

Land at least six bonus icons anywhere on the reels simultaneously to win either free spins or the top up bonus. You can choose between five different types of free spins. All five bonuses grant six free spins, but flood the reels with different symbols. The more valuable an icon is, the less of it is added to the board. For example, only 88 dragons are added to the board versus 128 fish.

During the Top Up bonus, all bonus symbols remain on the reels while re-spins are activated. During re-spins, your goal is to draw more bonus icons, or yellow and green coins. Yellow coins grant a payout equal to the total Fu value on the spin they landed on. Green coins win the accumulated Fu value total; all bonus symbols plus yellow coin payouts.

Finally, we have the Jin Ji Bao Xi special feature, which is a randomly triggered jackpot bonus. Pick through the different coins to win one of four fixed jackpots. Available jackpots are mini, minor, major and grand jackpots.
