With the help of the Release the Kraken 2 online slot, every player is taken on an underwater adventure. They will meet various marine animals and specific plants and find hidden treasures there.

Users can expect the well-known playing card icons as low-paying basic symbols on the paytable (from 10 to Ace). In addition, they can expect four more basic symbols represented by an Eel, an Anglerfish, a Pufferfish, and a Shark. The difference between the lowest and highest paying symbol here is relatively high. The Shark can provide ten times more than the 10, Jack, and Queen (up to 10 times the player's stake).

Reels

Like most online slots today, this game has 5 reels. Players can hit winning combinations by landing three to five matching basic symbols on a single payline from the leftmost reel to the right reel. The top-paying icon, the Shark, also provides payouts for two identical symbols on a payline.

Paylines

There's

nothing new in the reels department of this online slot. So, you're looking at a game with 20 fixed reels which is more or less a standard number in modern titles. It's not uncommon to cover paylines entirely with a single icon which is great.

RTP

All

Pragmatic Play slots have a default Return to Player (RTP) percentage. But this doesn't mean you can expect identical RTPs in all online casinos. Ultimately, it's their right to adjust the rate up to a certain level, of course.

Of course, the Release the Kraken

2 slot is not an exception. So, this slot's default RTP set by the provider is 96.50%.

To find the best RTP for this release, we created a list displayed below.

Remember that

it's not just the RTP that might affect your gameplay. For example, some websites have excellent casino welcome offers and bonuses. You should take these things into account
