Olá, bom dia! Welcome to our website, where we're always excited to share our knowledge and insights with you. Today, we're going to discuss the importance of creating a functional and user-friendly website for your business. A well-designed website can help you establish credibility, attract customers, and ultimately, drive sales.

Let's start with some basics. When it comes to creating a website, there are two main options: using a free website builder or hiring a web developer. A free website builder offers pre-designed templates and drag-and-drop editors that make it easy to create a website without any coding skills. However, these templates can sometimes be limited, and if you want to customize your website too much, it can end up looking tacky and unprofessional.

On the other hand, hiring a web developer can ensure that your website is fully customized and tailored to your specific needs. A professional web developer can create a website that is optimized for search engines, loads quickly, and is visually stunning. However, this option can be costly, especially for small businesses and startups.

So, which option is right for you? It ultimately depends on the goals and needs of your business. If you just want to have a simple online presence, a free website builder might be a good choice.

But if you're serious about attracting customers, generating leads, and growing your business, it's worth the investment to hire a professional. Let's see a summarized version in the table below:

Option	Free Website Builder	Web Developer
Cost	Low or free	High
Customization	Limited	Full customization
Design	Pre-designed templates	Custom
Features	Basic features	Advanced features
Security	Basic security	Advance Security
Speed	Slow loads	Fast loads

Now let's talk about some of the must-have features that your website needs to attract and retain customers. Firstly, your website must be optimized for search engines to get high ranks and attract organic traffic. This means including relevant keywords, meta descriptions, alt text for {img}, and internal and external links. Secondly, user experience (UX) and user interface (UI) design play a significant role in the success of your website. It's crucial that your website is easy to navigate, has a responsive design, and offers a pleasant user experience on both mobile and desktop devices.

Lastly, slow-loading websites lead to dissatisfied visitors and a high bounce rate that can negatively affect sales and search engine rankings. Websites taking longer than 3 seconds to load record a notable abandonment rate, whereas those taking longer than 10 seconds show abandonment rates as high as 123%. Ensure your website loads quickly to keep visitors on your page and get them to spend more time browsing through it.

To better illustrate this concept, let's compare two fictional examples. John's IT Consultancy, using a low-cost templated website, and Jessica's Tech Store, with a fully customized one.

John's IT Consultancy is a small, locally-owned business that helps professionals and businesses with IT struggles such as malware attack problems, home-network setups, and other IT needs.

Given its target audience only looks for basic services like virus removal and malware prevention, templates might be sufficient for their business's website, as most visitors probably find John's IT Consultancy from Google whenever they have a basic IT issue and not via brand recognition. For both organic and paid traffic, visitors only need to visit the site, engage briefly, and either call or leave a number for a callback later; thus, the site lives up to its full potential. Its appearance looks adequate for its basic purpose, which meets owners' expectations without any further customization. John's IT Consultancy's online presence is functional on every platform, fully maximizing its search value.

Jessica's Tech Store, on the other hand, sells personalized iPhones and new Android phones. The high-quality, bright {img} make the phones appear beautiful, creating a strong impetus to buy; customers feel that they might be sacrificing quality by not buying from other e-commerce megastores for a fraction of the price. Additionally, phones are often bundled and discounted along with quality genuine leather phone cases and accessories. The website accomplishes the vital job of emphasizing cross-sales in an eye-catching way on their welcoming page. When visiting the website, you immediately see a bundle offer, followed by many choices to review, keeping the traffic there to look. Since customers spend time scrolling and looking around, the website needs rich interactive multimedia elements such as moving and changing colors for slides or products and gripping visual pictures accompanying detailed descriptions even when the angle changes (360-degree views). These extras are not only visible/active when viewed from desktops but are optimized for full-screen viewing on any new phone or tablet. They highlight a video of any bundle deals, swaying customers that a non-Bundle purchase would be a raw deal, helping to add sales for products. Even their security measures like SSL (https) certificates help reassure the customers that the transactions will be done securely and legitimize that John, John's IT Consultancy, will never touch anything important as no one notices when only using his services from drop-down menus - as they should! Some new customers won't even hesitate to call with questions but mostly use live chats on their own. Jessica's needs not only great metatags or blog posts but professionally animated visuals/ UIs so the customer chooses the right specifications in their unique pricey devices perfectly - which the website does well. Glancing at the About Us section can convince anyone they're dealing with professionals in their trade and not the Russian warehouse known as Amazon!

The difference between its capabilities compared to the first consultancy example is vast - the vivid explanation in multimedia combined with fluid dynamics and a top-notch choice layout add life to this website and can sell many Tecno products and cases. For the said audience of hip teenagers, scrolling/choosing on whatever app without doing anything else can feel familiarly intuitive, just the same as any social media feed or regular feed like Instagram, combined with a blog, which is still on top. Hence it's reliable, fast, eye candy and well worth them spending time reviewing product information.

Jessica's store is on point compared to competitors, a small store that's often remembered, whereas John may appear less memorable in his organic presence in search online since he has held back immensely when designing his site solely to draw traffic there a la Google Ad. However, we understand that not all of you can be overspending site owners. For optimization, it may not be necessary to have a custom-developed website for your small business; just balancing optimization, cost-effectiveness, and potential growth limits is needed. Getting a website created usually doesn't need a professional SEO partner. A self-built site needs a low-poly logo, meaning small, simple, and of low resolution to avoid bandwidth loads. It keeps the file small whereas major-format graphics bump into slow SEO requirements that damage its loading speed. Many free and paid logo design tools can help you extract the brand logo to put on the website, providing proper color extraction to ensure identical image/font/alpha fills that stick great together rather than using an abundance of different vectors and colors like in a low effort Adobe Spark mockup. Instead of overloading the visitor, good advice would always be to utilize either monograms along with a logo or combine SVG graphics in favor of complex lettering so the logo becomes a picture combined with good ole imagery that brings life and branding to the website without multiplying multiple large {img}. And, really, with the choices of free and powerful graphic content generator and website maker tools online, high-powered computers aren't needed to wow even picky e-commerce visitors to complete a sale.

Templates and website makers come a long way to serve your needs adequately, so we'll explore a good break-even point using easy website-building tools like WordPress, which cut the need for hiring an expert coder or developer and lower web development costs to budget-friendly rates so anyone can make an eCommerce outlet that generates six figures a year. Imagine having an online business growing exponentially that is run on autopilot - entirely possible. Focus on allotting more of your limited resources in other important sectors that attract and help you keep existing customers growing your sales channel since technical aspects usually no longer involve as many limitations thanks to user-friendly drag-and-drop editors. One click suffices thanks to no-code editors with pre-made, lovely templates across dozens of providers, easily expanding into a sales funnel not only making it seem like a professional team developed it but providing free features that are ever-evolving to simplify getting customers and make your last view (LV) pop to scale quicker financially. Every choice that's made must still align with goals, including incorporating affiliate marketing, maximizing emailing, training opting-in memberships or subscription-based revenue models, as well as minimizing chatbot invasions! Create trust badges that appear and talk your customers into submitting important information. People value honesty/have loyal connections with genuine influencers, but LLPs and major affiliate/membership sites tend to leave lasting 1-2 sentence impressions with an input field that most marketers are desperate for. The impact starts in visitor experience right down to having high-resolution videos with text descriptions along animations explaining all steps of the purchase sequence, preparation, delivery, cancellations and help content. Using visitor videos and motion graphics isn't sufficient; they provide lasting lasting trust when partnered with smooth UI transitions. So add elements slowly to your site experience as 84% of visitors walk away forever if the videos stall or won't play though most marketers state it takes at least 30 sec into a video for maximum engagement by keeping attention! Simply put, video transcripts equate to videos watched on mute; other landing pages won't have videos that reveal products and services. Websites seldom update content unless scheduled by marketing for automated campaigns. So, use your imagination and see how fast you can achieve customer trust and sales from Google Ads or other sources but don't hesitate to customize products in views.

Miles de norcoreanos dieron la bienvenida a Putin en su visita a Corea del Norte

El presidente ruso, Vladimir Putin, recibió una calurosa bienvenida de miles de norcoreanos mientras visitaba Pyongyang, la capital de Corea del Norte, por primera vez en 24 años. Los ciudadanos, que ondeaban banderas rusas y norcoreanas, así como ramos de flores, se alinearon a lo largo de las avenidas principales de la ciudad para dar la bienvenida al líder ruso. Putin fue recibido con una ceremonia de bienvenida en la plaza Kim Il Sung, en el corazón de Pyongyang, donde soldados a caballo, personal militar y niños con globos vitorearon al ritmo de la música y ante los retratos de los dos líderes.

Putin y su homólogo norcoreano, Kim Jong Un, presentaron a sus delegaciones y estuvieron de pie mientras sonaba el himno nacional ruso. Después, los dos líderes se subieron a un descapotable y saludaron a la multitud mientras sonreían y saludaban.

Putin llegó a Corea del Norte en las primeras horas de la mañana del miércoles local para una visita poco frecuente, lo que refleja el acercamiento de Moscú a Pyongyang frente a la hostilidad compartida hacia el Oeste y las preocupaciones internacionales sobre su creciente cooperación militar.

Varios gobiernos han acusado a Pyongyang de suministrar armas a Moscú para su guerra en Ucrania, una acusación que tanto Corea del Norte como Rusia han negado, a pesar de las pruebas sustanciales de tales transferencias.

Se espera que los dos autócratas firmen un nuevo acuerdo de asociación estratégica como señal de su expansión de relaciones.

La visita también supone un gran impulso para Kim, quien sigue aislado en el escenario mundial debido a su programa de armas ilegales y no ha recibido a otro líder mundial en su capital desde el inicio de la pandemia.

Una relación en crecimiento

La creciente relación entre Rusia y Corea del Norte ha generado preocupación en Seúl y Washington, no solo por las transferencias de armas norcoreanas a Rusia, sino también por la posibilidad de que Moscú transfiera su tecnología militar superior para apoyar el programa de armas pesadamente sancionado de Pyongyang.

La tensión sigue siendo alta en la Península de Corea, ya que Kim ha intensificado el lenguaje

belicoso y ha abandonado recientemente una política de larga data de buscar una reunificación pacífica con Corea del Sur.
