The majority are staked at the start of the round before the cards have been dealt alongside regular bets and many have fixed odds that usually offer greater payouts than the simple 2:1 rewarded for beating the dealer.

**Are Blackjack side bets worth it?**

The majority of side bets feature only a small

chance of winning (as their large payouts suggest) and cannot be applied with conventional Blackjack strategy, meaning they offer the dealer and house a far greater edge than in the standard game.

As a result, they should predominantly be viewed as a

bit of fun, capable of enhancing your enjoyment but ultimately not a viable method of boosting your winnings over a long period of time. Any side bets you do want to place should be carefully considered and you must assess your chances of winning as best you can.

Despite this, side bets can provide a more exciting and faster-paced Blackjack experience for those who do not like being limited to one bet at a time and having to wait until the end of the round to see if they have won. When successful, side bets are also still capable of supplying substantially greater payouts from than you would otherwise receive in the standard game.
