Outright Betting on Sports

Online betting

is split up into two areas, outright betting and live betting. Outright betting is the process of placing a bet on an event or tournament before the event starts. This often provides bettors with the opportunities to place bets with higher value odds than what they would closer to the event. For example, for horse racing odds, ante post betting is a classic example of betting outright on a race. Meanwhile, live sports betting is the process of placing bets during an event. Unlike outright betting, these odds often

change within seconds, so sports bettors will have to be quick if they're looking to get the best odds available on a betting site. Meanwhile, if you place an outright bet, it is similar to fixed odds betting where your odds will never change unless specified.

Online betting FAQs

Does

BetUK have a cash out option when betting?

Yes! Here at BetUK, we have the cash out option available for players to utilise, there is no guarantee that the cash out feature will be available for your bet. However, when a bet matches certain criteria, you'll be able to cash out.

The cash out option, for those unaware, is a feature that allows sports bettors the ability to cash out the entirety or part-of their payout. In most occasions, the payout will be significantly less than the full potential win. Your bet may not be able to cash out if something is happening in the event and it would impact your betslip.

How do sports betting odds work?

Betting odds demonstrate the probability of an

event. If you view evens as 50%, under evens would represent an event that is likely to happen while over evens is what is unlikely to happen. These odds calculate the potential return that players may receive if they end up being successful in their bet.

Odds can be shown in three different ways, American odds, fractional odds and decimal odds are the three formats, American odds will be shown as the likes of +370 or -125. This demonstrates how much players would receive per £1. So, if your bet has odds of +370, this shows that you'd receive £3.70 for every £1 you bet.

Meanwhile, if you

place a bet at -125, you would get 75% of your stake as a profit, meaning £0.80 would come as the profit of a £1 bet.

Fractional odds are much easier to read for beginners

and that's what we would recommend all our bettors use. They come in the form of 1/10 or 10/1. If your bet pays out at 1/10, you will receive a 10th of your stake as profit.

Meanwhile, at 10/1, if you win a £1 bet, you will win £11, as you've won 10x your bet with your £1 stake as an addition. Decimal odds, on the other hand, can be viewed at odds such as 1.32 or 8.00, if the odds are shown at 1.32, this will provide players with 32p profit from a £1 bet. Meanwhile, if you win a bet at odds of 8.00, this will provide £8 profit for every £1.

Can I place a bet without opening an account?

No, in

the world of online gambling, safer gambling regulations require all players to have an account that is verified. This means to place a bet you will have to register for an account so we have your details on record. This is to ensure the safety of our players at BetUK, you will find that all betting sites in the United Kingdom follow the same regulations, meaning you must have an account to place a real money bet.
