How to Play Gonzo's Quest

Playing the adventure themed Gonzo's Quest slot is very simple. The game is an online video slot and is played over five reels with three rows and features 20 fixed paylines.

Prior to spinning, players need to select what Level they want to play at (1 to 5), plus the coin value. These two numbers will be multiplied together and then multiplied again by 20 (the number of fixed paylines) to produce your bet per spin. When you are happy with this amount, just press the big green spin icon found centrally at the bottom of the game screen.

The icons will then drop from your screen (rather than the classic "spin") and will show any winning lines. If you do have a winning line, these winning icons will then drop off the reels and allow other icons to fall in their place – which effectively acts as a free spin. What's more, for every consecutive winning payline you get, the game's famous Avalanche Multiplier comes into play.

Once you've pressed spin, the first winning line is at the normal x1 multiplier level, but the first lot of replacement icons will have a x2 multiplier. If these are then replaced by more winners, this will increase to a x3 multiplier, while a x5 multiplier comes into effect if you again win.

Gonzo's Quest is one of the most exciting jackpot games giving you the opportunity to discover up to 25,000 coin jackpot. Play Gonzo's Quest now!
