Roulette Simulator - Free Online Roulette Games

Play roulette immediately, no download, no money, no registration, simply in your browser.

Roulette Simulator is the roulette server for free online roulette games for fun and research. All our roulette games generate the random numbers with modern random algorithms and deal with (informative) points only. With our virtual roulette wheels you have the ideal interactive tool for understanding how to win and lose at roulette. All gamers who want to show up their skills are invited to our rated game where roulette enthusiasts from all over the world compare their game results. Have fun!

Playing and Understanding Roulette through Practical Use

With this free roulette simulator you can try out and understand the aspects of probability, logic, the rules and strategies of roulette. Of course without financial risk. We serve all this free roulette games for fun and research only.

How To Win At Roulette?

The riskier a bet is, the higher the possible profit a player can achieve when placing his bet. Different bets are possible, i.e. single numbers or groups of numbers. Groups of numbers are, for example, all red numbers or all odd numbers or all numbers in a series. A bet on red is in this sense a bet on 18 numbers. As a general rule, the fewer numbers there are in a bet, the greater the profit if it hits.

Is Roulette A Fair Game Of Chance?

Roulette is one of the most popular random number games and is considered a fair game of chance. The rules are clear and binding, and the odds of winning are comparatively high in contrast to other lottery games.

Is It Legal To Play Roulette?

In many countries, when it comes to real money wagering, roulette is subject to strict legal regulations. However, roulette is also very popular as a harmless toy. As a toy with a plastic wheel and a playing field made of fabric, roulette has even been played in schools to demonstrate

the theory of probability and probability distributions to students in mathematics.

How good are the random numbers on Roulette-Simulator.info? The random number generator is the heart of an online roulette game based on random numbers. We always try to ensure a high-quality entropy feed into our random number generator. In fact, we generate random bytes in our internal server entropy system when generating the random numbers for the roulette simulator.

Online Roulette and Randomness An experienced player usually tries to bridge the house advantage by the aid of progression strategies. These strategies are well-known probabilistic theories that are described in more detail here. These concepts are, however, limited in their effectiveness. But they can give the strategist an advantage over the laity and seem to work for a certain period of time. While the player has to decide on a prediction before the occurrence of a random event, the decision is made randomly. The roulette engine must be designed in a way, that no safe prediction about the next event can be made. So a random event can not be predicted, nevertheless we can look more closely at random events and make certain statements. It is certain that 1 event from 37 or 38 possible random events will occur. The goal of the roulette player is to stand as a winner in as many of these events as possible.

Short History about Roulette

Roulette exists since the 18th century in France and became more popular in the 19th century in Italy, Germany, UK and in the first part of 20th century in US. Nowadays Roulette is famous in most countries of the world. The invention of the roulette wheel was not intended to create a device for one of the most beloved games of gambling. Instead it was thought as wheel of numbers which solidly creates random numbers in a mechanical way and offers the possibility for studying random distributions. There is no proof about the exact age of the roulette wheel. In some sources Blaise Pascal is credited as the inventor, others claim that European traders found the idea of a numbered wheel in China and imported it to Europe.

Risks in Roulette

Roulette and gambling in general may be dangerous when players in precarious situations risk their financial integrity. Gaming on money has always the potential to cause big suffer. Most people usually don't know when to stop. Even if a roulette game goes well and a player could leave the session with a nice profit, in most cases the player will try to increase the profit, and after that increasing it again and again. Which often ends up in a total loss of the initial stake. The false impression of continuously making unlimited profits through roulette can also lead to pathological gambling.

Roulette-Simulator.info has eliminated these risks by making it impossible to play for money on this server. All scores are purely informative.

Chances in Roulette

In the same fashion of possibly suffering a loss there are chances for profits in roulette. Additional information on the payout ratios can be found here: What are the odds of winning at roulette?. Many players share the experience that especially in the beginning of a roulette game their predictions are better. This phenomenon could be called FreshMenBonus. Our stats from the Rated Game show that a lot of the lost games had massive peaks of profit before the match went down in the end.
