contente:

At land-based casinos you'll often find rooms filled with slot machines from various game developers. The games are played in a very similar way to their online counterparts, although due to space limitations you'll find that the selection is perhaps not as great.

When players say they know how to beat slot machines at a casino, it really means increasing their chances of winning at slots. As usual, you'll be relying largely on pure chance. There are plenty of theories out there, for example that machines can be 'hot' or 'cold' depending on when they last paid out, or that those closest to the walkways are 'looser' in order to entice customers. However, this is very unlikely to be the case - casinos are, after all, in the business of making money and don't want to make it too easy to win.

How to win at penny slots

One type of casino slot you'll find pretty much everywhere, from your local casino to the Las Vegas Strip, is penny slots. By betting such a small amount of money, you might think the payouts won't be so big. However, by playing the max number of paylines and credits, some players have been known to walk away with hundreds of dollars from a penny slot machine. They're certainly worth a try if you're on a smaller budget.

Hotline (NetEnt): Introduction

There is no doubt about the source of inspiration for this game. Yes, you guessed it - Miami Vice! This slot is very much produced like a videogame with a cool intro and clips throughout the game. NetEnt have definitely managed to capture a feeling of speed, action and 80's nostalgia.

At first glance, it

looks like a standard setup, with it's 5 reels, 3 rows and 30 paylines. But NetEnt are trying new stuff here and is introducing a new feature called Bonus Bet.

The Hotline

mechanics is a simple concept: players choose a row – a Hotline – and Wilds landing on that row expand to cover the entire reel and stick during Re-Spins. In Free Spins, the expanded Wilds stick for the entire Free Spins leading to the ultimate excitement.

For

an additional wager, players can activate the Hotline Bonus Bet feature and choose more Hotlines to increase the possibility to win Expanding Wilds and Re-Spins on two rows, or on a maximum of three rows for the best chances of covering all reels with Wilds.

Hotline (NetEnt): Features

The Hotline Bonus Bet is a feature that increases the chance to win Expanding Wilds and Re-Spins for a higher bet. Every row is a Hotline. Every Hotline can be activated or deactivated at players' choice. One Hotline is always activated. When one Hotline is activated, the game is played with Base Bet (15 coins

per bet level). If two Hotlines are activated, the game is played with Double Bet (30 coins per bet level) and if three Hotlines are activated, the game is played with Triple Bet (45 coins per bet level). The more Hotlines are activated, the higher is the chance for Expanding Wilds and the possibility to win Re-Spins.

Wild symbols can appear

anywhere on the reels in the main game, Re-Spins and Free Spins and substitute for all symbols except for Scatter symbols. If a Wild symbol lands on an activated Hotline, it expands to cover the entire reel. Wild and Expanding Wild symbol substitution pays the highest possible winning combination on a bet line according to the Paytable.

In the

main game and Re-Spins, if a Wild symbol lands on an activated Hotline, it expands to cover the entire reel and awards a Re-Spin after all wins have been evaluated.

The

Expanding Wild remains on the reels until the end of the ReSpins. Re-Spins end if no new Wild symbols land on an activated Hotline.

3 Scatter symbols appearing anywhere on

reels 1, 3, and 5 in the main game activate 7 Free Spins. In Free Spins, if a Wild symbol lands on an activated Hotline, it expands to cover the entire reel and remains on the reels until the end of the Free Spins. Additional Free Spins cannot be won during Free Spins. Free Spins cannot be activated during the Re-Spins.

Hotline

(NetEnt): Verdict

Hotline is a well produced game, there is no doubt about that. NetEnt apparently have enormous resources to invest into their productions and the games are looking increasingly like video games. But good looking slots don't reach all the way if the potential and solid game mechanics are not included in the package, and we're not sure it is.

Max win on a single spin appears to be only 400x with a full screen of expanded wilds. However, since these are sticky in the bonus it could in theory pay 2,800x, but that would require to trigger all wilds in the first spin.

When testing the

game it didn't take too long to trigger the first bonus, which payed around 50x. After that it was downhill from there. The Re-Spin feature in both main game and bonus is a bit fun and the only thing that keeps this game somewhat interesting, but symbols are low paying and there is no sense of great potential to keep one excited.

The max win

limit on this slot is €60 000, or €2000 on a single bet line (30 bet lines). The RTP,

meanwhile, in this game varies depending on the number of Hotlines activated: 1

Hotline: 96.13%, 2 Hotlines: 96.70%, and 3

Hotlines: 97.04%

Don't Miss

If you enjoy the Hotline slot from NetEnt, be sure to check out the sequel Hotline 2 as well.

O bet 95, também conhecido como margem de lucro de 95%, é um termo utilizado no mundo das apostas desportivas e cassinos online. Ele se refere à vantagem matemática que as casas de apostas possuem em bet sp relação aos jogadores.

Em 3 outras palavras, o bet 95 significa que, em bet sp média, a casa de apostas manterá 95% de todas as apostas como lucro, enquanto que 5% serão devolvidos aos jogadores em bet sp forma de ganhos. Isso significa que, quanto maior for a margem de lucro, mais difícil será para os jogadores obterem ganhos significativos.

Por exemplo, suponha que duas equipes de futebol, A e B, estejam prestes a se enfrentar em um jogo. Se a casa de apostas estabelecer uma linha de dinheiro igual para ambas as equipes, isso significa que eles esperam que as duas equipes tenham as mesmas chances de vencer. No entanto, mesmo que as duas equipes sejam equivalentes em termos de habilidade, a casa de apostas ainda terá uma margem de lucro embutida nas probabilidades que eles oferecem.

Em resumo, o  $\beta$  é uma medida da vantagem da casa de apostas em relação aos jogadores. Quanto menor for esse número, melhores serão as perspectivas de lucro para os jogadores. Portanto, é importante que os jogadores busquem casas de apostas com as menores margens de lucro possível.
