As tournament players, perhaps we sometimes feel pressured to make a move earlier in a poker tournament than we'd ideally like to. Maybe the situation is not perfect, but we've noticed the blinds-levels appear to be going up rapidly. Unless we take the current opportunity, we could easily end up becoming hopelessly short-stacked.

If we had the luxury of never needing to worry about running out of chips, perhaps we would have passed up on the marginal opportunity that faces us in favour of a much stronger situation. Unfortunately, this is not how tournament poker works. We can't go around playing individual hands in isolation. We have to seriously consider something that isn't a factor for cash game players - our tournament life.

The best decision at a tournament table is always going to take into account the effective stacks and the blind-levels. We are interested in how "healthy" our stack is relative to the blinds, which will help to dictate our strategy. If only there was a formula we could use to help us calculate this...

Actually, there is – it's commonly referred to as "M-ratio" or just "M" for short.

Table of Contents

M Ratio – The Calculation

The idea behind "M" is that it tells us how many rounds we will last given our current stack size and the size of the blinds/antes.

So let's see if we can calculate our M for a simple tournament situation.

Question – We have R\$1,000 in our stack. The SB is R\$10, the BB is R\$20, and the antes are R\$1 and we are playing 10-handed. What is our M?

We simply need to add the relevant values to the formula. "Antes" stands for total antes that are played in a round and would, therefore, be calculated as:

Ante-price * number of players

We are interested in the amount we pay for antes in the entire orbit, rather than just the value of an individual ante. So in this case, if the value of an individual ante is R\$1 and we have to pay it ten times per orbit, we will pay a total of R\$10 in antes each orbit.

$$M = R\$1000 / (\$10 + R\$20 + R\$10)$$

$$M = R\$1000 / R\$40$$

$$M = 25$$

An M of 25 essentially means that we can last another 25 orbits, assuming the structure of the hands remains the same. Which of course, it won't, because soon the next blind level will arrive

and our M will become considerably reduced. So having an M of 25 in a regular tournament is not the same as having an M of 25 in an ultra-turbo tournament. The blind structure must be taken into consideration.

Using M Value to Make Decisions

We now have calculated our value for M, but on its own, it's not going to be especially useful. How can we use our value for M to help us define our strategy in a tournament setting?

In his book *Harrington on Hold'em*, Dan Harrington provided some rough guidelines for how we should evaluate and use our value for M. He defined several zones in which the value of M may fall, and described what our resulting strategic outlook should be.

M is greater than 20 – The Green Zone – With an M larger than 20 we typically have the luxury to choose whichever style we prefer, whether that be a conservative or aggressive style. We have enough time to be patient and wait for strong holdings, but we also have the freedom to dabble with more speculative hands and play aggressively. Taking some losses is not a huge problem at this stage, and the effective stacks are still deep enough that we can get away with expanding our range in some scenarios.

M is 10-20 – The Yellow Zone – Now we are starting to feel the time pressure a little bit. We must start looking for spots to get involved and play hands. Some of the more speculative poker hands we may have been able to play while in the green zone may now suffer from reduced playability. This reduction is a result of the smaller effective stacks.

M is 6-10 – The Orange Zone – The pressure tightens here, and we want to avoid wasting any chips. Cold-calling starts to become risky. Our main focus should be trying to be the first player involved in the pot, wherever possible. If we are the ones open-raising, we have increased expectation as a result of additional fold-equity. This is valuable here since every chip counts.

M is 1-6 – The Red Zone – We have now reached what is known as the push/fold stages of tournament poker. We only have two options at this stage: Move all-in or fold.

M is less than 1 – Dead Zone – We should avoid this particular zone at all costs. Nearly everything is dependent on luck at this stage. We want our tournament career to be about skill, not luck. We should look for a spot where we are first to act and shove all-in, hoping to get lucky. Players have gone on to win big tournaments even after arriving at the dead-zone, so not all hope is lost. In most cases, though, our tournament life is over.

Adjustment for Shorthanded Tables

The M calculation works for tables of all sizes. The number of orbits we have left, won't change hugely based on the number of players at the table. It will change slightly, since we will pay a different amount of antes, meaning we will have slightly more orbits remaining assuming the tables get shorthanded. (Usually the tables will get shorthanded only when approaching the final table. For the most part, we will be playing tournaments with max capacity).

But is having an M of 5 on a 5-handed table the same as having an M of 5 on a 10-handed table? Not really. Although the remaining number of orbits won't change that much, we will have twice as many opportunities to play hands on the 10-handed table.

To help us deal with this, we can make use of what is known as effective M, which takes into account the need to make faster decisions when the tables become shorthanded. We can refer to the standard value of the M calculation as simple M.

The relationship between the two is as follows:

Essentially, we are taking a percentage of Simple M based on how "full" the table is, assuming that a full table contains 10 players. So if a player has a simple M of 10 on a 5-handed table, then he has an effective M of 5.

Let's try a question to put everything together.

Question – Effective stacks are R\$1,000. Blinds are R\$20/40 with antes of R\$2. We are 5 handed. Calculate simple M and effective M.

Okay, hopefully, you should be able to do this on your own. The calculation is below:

Simple M

$$\text{\$1000} / (\text{\$20} + \text{R}\$40 + (\text{\$2} * 5))$$

$$\text{\$1000} / (\text{\$20} + \text{R}\$40 + \text{R}\$10)$$

\$1000/R\$70

Simple M = 14.3

Effective M

$14.3 * (5/10)$

$14.3 * 0.5$

Effective M = 7.15

So the next time we are at the poker tables, let's try to be aware of our M-ratio. Use it to help define the strategy we will be using at any given stage of the tournament.

What are Beyblade Burst Games ?

Hello boys and girls and I guess you are looking forward seeing what has prepared 5 to you this awesome gaming category, which involves, as you can predict judging by the title of this category, Beyblade 5 Burst adventure. Most of you already know what is Beyblade Burst and you only are here for fun but for 5 the others, who are beginners in this domain, let's make an introduce for you in this awesome world of gaming, 5 alongside the Japanese heroes from Beyblade Burst. They are Japanese because the TV animated series Bleyblade, is created by the 5 Japanese, originally being a manga, with such a great storyline, which has not became famous just like this, over the 5 night, but it took a while, but in the end, the quality of the story, the amusement and the values 5 presented in the series, have successfully pointed out its important character. There are a lot of toys with Bleyblade too, 5 so it has been a kind of viral since a couple of years ago, and it is still doing pretty 5 fine. As the other Japanese animated series manga like Pokemon or Yu-Gi-Oh or Dragon Ball Z, Bleyblade impressed with its 5 incredible lesson from each episode and of course, it proposes something catching for the people from all around the world, 5 especially in the western world, where it's the most important. Beyblade Burst edition has been launched not long ago and 5 it had such a great success not only among the teenagers, due to fact that the classical Balyblade started a 5 couple of time ago, so that's why this category of games must present interest for many people, not only kids 5 but teenagers and even adults! In Bleyblade Brust, the whole story starts with the kind of main character, a fifth 5 grader boy, Valt Aoi. He is simply crazy for this Blayblade thing, which is a kind of fight between at 5 least two players at once, who compete against each other using each of them their bladeblades, with a spinning ball 5 on the top of it. The spinning balls are released and the balls start fighting each other, then they turn 5 into some monsters in the real dimension and they fight there and only the strongest one survive and the other 5 one is seriously damaged, and his bleyblade is destroyed. In the most of his time, Valt tries to learn everything 5 about the Bleyblade art of fight, the competition, the tournament where only the best players in the world are engaged 5 and he dreams to win the big tournament one day. His partner is Valtryek, an average beyblade but it is 5 ready to progress and grow up alongside his master, sticking together it doesn't matter what. Valt has such a great 5 friend, named Shu Kurenai. Shu is called one of the Four Spin Emperors, which means that he is one of 5 the greatest beyblade players in the world, thing which motivates Valt even more than he was! Shu is considered a 5 real genius when it comes to this fantastic Beyblade world and competition but he is a good friend of little 5 Valt, despite the actual difference between them. Valt kept practicing and one day joined the tournament of Beyblade so he 5 chases only victory, so his main goal, even since the beginning, is to win the competition and conquer each fight 5 he is engaged,

thing almost impossible, but he has a dream and a vision! The series promotes values of life 5 like friendship, encourages you to chase your dreams and follow your instincts and practice so many times in order to 5 make what you've proposed to you, it doesn't matter the circumstances. The rest of the story, will be found by 5 you only if you join this incredible gaming world, where you can find so many incredible themed games, with bleyblade 5 creatures, spinning balls, Shu, Valt, their creatures in different postures like puzzle challenges, memorizing games or even coloring books! Good 5 luck and you will definitely not be disappointed for your choice!

Nasrin Sotoudeh: A Luta Heroica de uma Advogada de Direitos Humanos no Iran

A prisão Qarchak de Iran é descrita como um local de tortura, o pior presídio feminino do mundo e não adequado para seres humanos. AAdvogada de direitos humanos e ativista Nasrin Sotoudeh descreve apenas uma palavra para os nove meses que passou lá: "Inferno".

Sotoudeh não fala das condições deploráveis ou o cheiro de esgoto, da água imprópria para beber ou falta de comida, das doenças ou crueldade da solidão. Ela simplesmente diz: "Eu estou pronta para voltar sempre que eles disserem."

A advogada e ativista estava no terceiro ano de pokar bet sentença de 38 anos, juntamente com 148 chicotes, quando foi suspensa por motivos médicos após ser diagnosticada com uma condição cardíaca pokar bet 2024.

Sua liberdade temporária significa que ela vive pokar bet Teerã com seu marido, Reza Khandan, e filho, Nima, 16 anos, mas isso não a libertou da constante assédio do governo. As autoridades foram incansáveis pokar bet seus esforços para silenciá-la, trazendo três novos casos contra ela; sentenciando-a a mais oito anos de prisão; proibindo-a de praticar advocacia e usar mídia social; sentenciando seu marido a cinco anos; congelando seus ativos bancários; e proibindo pokar bet filha, Mehraveh Khandan, de sair do país.

A restrição sobre Khandan, 24, que agora está estudando arte nos Países Baixos, foi a única violação da liberdade que Sotoudeh teve sucesso pokar bet combater.

A luta constante pelo direito à liberdade

"Minha família e eu enfrentamos constantes sabotagem legal que o sistema judiciário contra nós," diz Sotoudeh, que completa 61 anos este mês.

Porém, é a determinação assassina do regime pokar bet esmagar toda a dissidência que magoa a mais. As mortes de Mahsa Amini pokar bet setembro de 2024, e outras jovens, como a de 16 anos Armita Geravand, que foi atacada pela polícia do véu no metrô, "foram a coisa mais difícil de suportar".

Sua licença médica coincidiu com o governo intensificando pokar bet guerra contra as mulheres. Protestos pokar bet massa desencadeados pela morte de Amini foram recebidos com repressão violenta pelas autoridades, resultando pokar bet centenas de mortes e milhares de prisões. Nos últimos meses, {sp}s de mulheres sendo arrastadas à força das ruas pela "polícia da moralidade" emergiram à medida que o governo aumenta seus esforços para impor o véu com uma nova campanha, chamada Noor (significando luz); e o rapper Toomaj Salehi recebeu sentença de morte por seu apoio ao Movimento Mulheres, Vida, Liberdade.

"É difícil acordar um dia e saber que Mahsa está morrendo e acordar outro dia e saber que ela passou; então acordar outro dia e saber que Armita morreu quando você vê esse tipo de violência contra suas jovens e mulheres. Quando você vê isso, você pergunta: o que devo

fazer?" ela diz.

"Então, quando me lembro de ser uma criança e ir a um parque de diversões e entrar no túnel do medo e gritar; essa pesadela da infância tornou-se um pesadelo da vida adulta - é assim que viver para mim se sente: vivendo nesse escuro túnel da morte.

"Para as mulheres que se importam com essa situação a única maneira de lidar é continuar com suas vidas."
